## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 6, 12, 13, 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cone.

Cone discloses a telescoping waterway for raising and lowering a sprinkler comprising a hollow outer tube 12, an internally threaded nut 16 at the top of the tube 12, and a hollow inner tube 14 within the outer tube 12, the inner tube 14 comprising a threaded outer wall 32 engaging the internally threaded nut to allow relative movement between the inner tube 14 and the outer tube 12. The device of Cone is fully capable of raising and lowering a firefighting monitor. Regarding to claim 2, an adjusting tool (Column 3, lines 49-54) is considered to be a drive mechanism operably connected to the nut 16 and the device of Cone is capable of being mounted on a fire truck deck as recited in claim 6. The ribs 39 in combination with a tool engaging the ribs to adjust tube 14 is considered to be an actuator as recited in claim 12.

### ***Allowable Subject Matter***

3. Claims 3-5, 7-11, 14-16, and 18-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3752

**Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Dyck, Mountford, Thompson, and Horwinski are pertinent to Applicant's invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904.
